Manufactured by
Paramount Film Cans
England

Prices are in Pounds Sterling and terms are ex. Works Basildon.

The traditional film can is manufactured from British tinplate 0.30 - 0.36 mm thick temper 2, in 'bright' finish as standard.

Many worldwide film archives agree, tinplate has excellent inert qualities that allow film to be stored for immensely long periods of time without reaction or contamination.

Options

Metal cans can also be finished in gold or silver lacquer or powder coated to the colour of your choice at extra cost - minimum quantities may apply.

Metal film cans are finished in bright material only.

Sold by
Dancan Cinema Services S.L.
Calle Explanada de Castillete 3 - X66
35138 Puerto de Mogan
Las Palmas de Gran Canaria
Spain
